

# Red Lake Tracking Station – Site Map

Modified from a diagram in the 1960 Western Electric publication, "Introduction to Project Mercury and Site Handbook" produced for NASA. Note: Here, the location of the Telemetry Bore-sight Antenna has been moved south by approx. 28 metres from the position marked on the NASA diagram, to be consistent with satellite and ground-based photographs of the site. Colin Mackellar, www.honeysucklecreek.net, 2010.
